Ontario Market Price	HOEP/WAHP				
Retailer	Contract price				
*Interval metered customers are billed at the Hourly Ontario Energy Price (HOEP) plus Global Adjustment.					
*All non-RPP and non-retail customers, without interval metering, are billed at the Weighted Average Hourly Spot Price (WAHP) plus Global Adjustment.					
*Customers who have signed a contract with an electricity retailer are billed at their contract price plus Global Adjustment.					
GLOBAL ADJUSTMENT					
If you are paying HOEP/WAHP or purchase electricity from a retailer, you will see a separate line item on your bill for Global Adjustment. The Global adjustment accounts for differences between the market price of electricity and the regulated or contract prices paid to generators for the electricity they produced. The Global adjustment also includes the cost of Ontario Power Authority conservation and demand management programs.					
Global adjustment is calculated monthly by the IESO. It can be either a credit or a charge to consumers depending on fluctuations in the market price. (see www.ieso.ca)
