

Connection Impact Assessment Study Fee Schedule

Fee Schedule for Connection Impact Assessment (CIA) completed by NPEI

CIA Category	Applicable Project Type/Size	Cost
1	<p>All three-phase generation project (including net metering, load displacement and energy storage systems) applications that are:</p> <p>a) > 10 kW and ≤ 30 kW connecting to a NPEI supply feeder with a voltage less than 15 kV;</p> <p>OR</p> <p>b) > 10 kW and ≤ 100 kW connecting to a NPEI supply feeder with a voltage of 15 kV or greater</p>	<p>\$2,000.00 + HST</p>
2	<p>1) All three-phase generation project (including net metering, load displacement and energy storage systems) applications that are:</p> <p>a) > 30 kW and ≤ 250 kW connecting to a NPEI supply feeder with a voltage less than 15 kV;</p> <p>OR</p> <p>b) > 100 kW and ≤ 500 kW connecting to a NPEI supply feeder with a voltage of 15 kV or greater.</p> <p>2) Single-phase generation projects (including net metering, load displacement and energy storage systems) applications connecting to a NPEI supply feeder that are greater than 10 kW or ≤ 150 kW.</p> <p><i>Note: Single-phase generation project applications cannot exceed 150 kW.</i></p>	<p>\$3,200.00 + HST</p>
3	<p>All generation project applications (including net metering, load displacement and energy storage systems) that are:</p> <p>a) > 250 kW connecting to a NPEI supply feeder with a voltage less than 15 kV;</p> <p>OR</p> <p>b) > 500 kW connecting to a NPEI supply feeder with a voltage of 15 kV or greater.</p>	<p>\$7,500.00 + HST</p>

Important Notes:

- CIA fees represent the costs for performing the Connection Impact Assessment study only.
- For generators connecting on a feeder with other shared upstream Utilities, that utility may be required to perform its own Connection Impact Assessment. Details including other Utilities' costs will be provided with the Preliminary Consultation Report.
- Refund policy: Any money not spent will be refunded if the CIA is withdrawn before completion.
