

Energizing our Community through Suite Metering.

Suite metering is fair for all condominium owners!

Benefits for property managers, condo corporations and condo owners:

- Cost of metering equipment is eligible for certain service entitlements and credits as per our Conditions of Service
- Separate accounts are created directly with Niagara Peninsula Energy Inc. for the suites
- Niagara Peninsula Energy Inc. provides turnkey service including meter reading, billing and collections
- Niagara Peninsula Energy Inc. operates and maintains the suite meters including re-certifying the meters
- Niagara Peninsula Energy Inc. will work directly with each customer regarding billing and services
- Niagara Peninsula Energy Inc. rates are transparent and regulated by the Ontario Energy Board
- Suite owners gain access to paperless billing and hourly, daily and monthly energy consumption information through Niagara Peninsula Energy Inc.'s FREE My Account system.

Suite metering gives condo owners direct control over their own electricity consumption and costs.

Generally, people who pay their own electricity bill consume less energy!

Studies show that those who pay their own electricity bill tend to use less electricity. The consumption savings have been demonstrated to be about 20%*.

Suite metering is a financially prudent course of action for the condominium corporation.

When a building is suite metered, building management becomes responsible for only common area usage. The resulting budget is lower and more predictable, which makes for more stable cost management.

Suite metering reduces the impact of electricity price increases to the corporation.

Owners who reduce their energy usage will be less affected by any electricity price increases. Those that choose not to conserve will pay more, but only based on their individual suite usage.

Suite metering gives you the ability to take advantage of time-of-use rates.

Because owners have direct control of their own electricity usage, they will be better able to manage their costs and consumption.

Suite metering increases the value of the building.

Lower maintenance fees are a result of unbundling the suite electricity costs. This is becoming more important because of the need to compete with the large numbers of condominium units in our service area - all of which are suite metered for electricity
